Monthly Assessment - October 2026

Artificial Intelligence - Grade X

Set: A	Maximum Marks: 20	Suggested Time: 45 minutes

ANSWER KEY & MARKING GUIDELINES

SECTION A — MCQs (10 × 1 = 10 marks)

Q1. A) Complexity of human languages

Q2. C) Understand natural language

Q3. D) Document summarisation

Q4. B) Segment text into smaller units

Q5. A) Lemmatization produces meaningful base words; stemming may not

Q6. B) Extract text features for machine-learning algorithms

Q7. B) Common words often removed when they add limited value to a task

Q8. C) They may occur less often but carry useful information

Q9. A) Word counts or presence for a document

Q10. C) Estimate a word's importance in a document relative to a corpus

SECTION B — SUBJECTIVE (10 marks)

Q11. Mention any two features of natural languages. (2 marks)

Suggested answer: Natural languages are used by people to communicate and can be ambiguous or context-dependent. They evolve over time and include grammar, vocabulary, idioms and variations.

Q12. Explain lexical analysis in NLP. (2 marks)

Suggested answer: Lexical analysis examines text at the word or token level. It identifies and processes words/tokens, often after text is split into smaller units.

Q13. What is a chatbot? Give one practical use. (2 marks)

Suggested answer: A chatbot is a program that communicates with users through text or speech. It can answer customer questions or provide website support.

Q16. Normalise the following sentences: convert to lowercase, remove punctuation, and remove the stop words “and”, “are”, “to”, “but”. (4 marks)
Document 1: Akash and Ajay are best friends.
Document 2: Akash likes to play football but Ajay prefers to play online games.

Suggested answer / marking points: Possible result:
D1: akash ajay best friends
D2: akash likes play football ajay prefers play online games
Award marks for lowercase conversion, punctuation removal, tokenisation/segmentation and stop-word removal.

Accept equivalent correct answers. Award partial credit for relevant concepts and correct intermediate steps.
